

③ Find the measure of each lettered angle.

④ A triangle has sides of lengths 4, 5 and 6 cm. Is it a right triangle?

⑤ Simplify:

a) $(2x)^3$

b) $\frac{x^9}{x^4}$

c) $3y^2 \cdot 2y^4$ d) $(-3x^2)^4$

⑥ A is the "center" of the rectangle. Find the area and perimeter of the triangle.
